

Create Home Position with IP PTZ

IV-IPPTZ4X28122MP, IV-IPPTZ4X28124MP, IV-IPPTZ4X28125MP

Please work with INTERNET EXPLORER with proper Active X Plug-in Installed for PTZ home setting

- Locate the PTZ Control Interface on the camera through Internet Explorer

1. Creating Presets

- Using "PTZ Control", move the camera to desired view.
- Assign the Preset #, and click "SET".
- Test the Preset (as needed).
 - Move the camera using PTZ Control
 - Select the Preset # (1, 2, 3, etc....)
 - Click "Call".

2. Creating Home Position – Need to create a preset first.

- Select "Preset 94" and click "CALL".
- Select the desired preset # to be used as HOME, and click "CALL".
- Select "Preset 93", and click "CALL".
- Reboot the PTZ camera.
- Test the HOME Position. -
 - Move the camera using PTZ Control.
 - Wait 5 seconds
 - Camera will move to designated HOME Position.
